Drunken Microwave is a concept web project built to showcase a hypothetical microwave designed for: the blind, the deaf, and the blackout drunk.

The site exaggerates accessibility and simplicity to the point of parody—while still demonstrating real UI thinking around clarity, tactility, and usability.

## Key Features

### Ultra-Simple Interface

With just one dial and two buttons, this microwave is incredibly easy to use for people of all abilities.

### Voice Guidance

Clear voice prompts guide users through every step, making it accessible for the visually impaired.

### Tactile Controls

Large, tactile buttons and a textured dial provide essential feedback for those with limited vision or dexterity.
